

Refurbishment Program

RF POWER GENERATORS

Safeguard your investment in MKS RF Power Generators with our certified Refurbishment Program. MKS factory-certified technicians complete a comprehensive refurbishment and test process developed by the original product design engineers to ensure that your RF Power Generators are operating at peak performance and will continue to do so for years to come.

All refurbished generators are backed by a full one-year warranty to ensure you have the best ownership experience. Trust the original manufacturer with the care and maintenance of your MKS RF Power Generators. Trust MKS.

Scope of Work

- Returned unit is screened thoroughly by our repair technicians for both operational and physical condition.
- Unit serial number is checked against the MKS manufacturing database to determine which relevant service bulletins and software/hardware reliability improvements are applicable.
- Customer-specific settings cleared and factory default parameters loaded. Customer-specific parameters or programs are captured and stored for upload at the completion of the refurbishment.
- Proactive replacement of *high risk of failure* parts based on our repair database. Any additional faulty parts are also replaced.
- Chassis and cover cleaned, touched up, or repainted as needed.
- A comprehensive set of diagnostic, functional, and quality checks, and an extended burn-in are performed to ensure that the generator is operating *like new*.
- Comprehensive test report.
